

In Vitro Incubation of AFB₁ and DNA - JE-3

5-26-75

JE-2 was lost, for analytical purposes, because it tipped over in the cold room. A new incubation of AFB₁, DNA and rat liver microsomes will be made in order to provide adduct for identification.

- Amount of DNA - ~240mg
- Six flasks.

The standard conditions were used and the details have been recorded by Bill Busby.
